

COVID-19 Response Stakeholder briefing

04 February 2021

COVID-19 Vaccination update: Brighton and Hove

Welcome to your regular briefing from the Sussex Health and Care Partnership on the roll-out of the COVID-19 vaccination programme in Brighton and Hove.

Introduction

The COVID-19 vaccination programme continues to be rolled out across our communities. The top line brief from this week is:

- We are on course to meet the national target for offering the COVID-19 vaccination to the top four priority groups by mid-February;
- Three large vaccination centres are open across Sussex; the Brighton Centre, The Welcome Building, Eastbourne and Crawley Hospital;
- Residents living in all care homes for older people in Brighton and Hove have been offered the COVID-19 vaccine. A small remainder of homes in Sussex have had visits deferred for safety reasons, following a risk assessment, during a local outbreak;
- Our GP-led vaccination services is available to all registered patients who are eligible for a vaccine;
- Seven hospital hubs are currently focussing on vaccinating health and care staff;
- Housebound patients, who cannot attend a vaccination site, are being contacted and visited by a roving service to take the vaccine into people's own homes
- Our 'When will I get my jab?' campaign continues to make sure residents know where to get information about their vaccine

Latest position

The latest official national data on vaccinations has been published today, this data reflects vaccinations up to January 31.

For full data: <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-vaccinations/>

In the week since this data was recorded, progress has continued to be made and we remain on course to have offered the vaccination to the top four priority groups by mid-February, in line with the national target.

Our current position is:

- **Priority 1 - Residents and staff in a care home for older adults** - all older peoples care homes have received first dose vaccinations with the exception of a small remainder of homes who have been deferred due to an outbreak. Vaccinations for these homes have been scheduled.
- **Priority 2 - Frontline Health and social care workers and aged 80+.** Front line NHS staff have received first dose vaccination and we are working to ensure that remaining social care staff vaccinations are completed by February 15th. The majority of people aged 80 and over have been completed, with the remainder expected in the next two weeks.
- **Priority 3 - Aged 75-79.** 79.3% of those aged 75-79 have received the first dose vaccination in Brighton and Hove. The remainder of the cohort is expected to be completed by February 15th.
- **Priority 4 - Aged 70-74 and Clinically extremely vulnerable individuals** – 33.6% of those aged 70-74 have received the first dose vaccination and the remainder of this cohort is expected to be completed by February 15th. We have identified those who are clinically extremely vulnerable and are actively working with our PCNs to ensure this cohort is vaccinated as early as possible.

Data this week shows:

| 04/02/21 | Sussex | | Brighton and Hove | |
|----------------|------------|-------|-------------------|-------|
| Priority group | First dose | % | First dose | % |
| Age 70-74 | 36,186 | 35.4% | 3,784 | 33.6% |
| Age 75-79 | 63,095 | 81.4% | 6,176 | 79.3% |
| Age 80+ | 97,624 | 86.6% | 9,371 | 80% |

How services are working

There are a number of ways in which the vaccination is being rolled out to our communities:

- **GP led vaccination services** – these include the GP led or community vaccination services, and pharmacy services in some areas;
- **Large vaccination centres** – each county will have at least one large vaccination centre which will be able to give the vaccine to large numbers of people as more supplies become available. The Brighton Centre went live last week for anyone in the eligible groups living within 60 miles;
- **Roving service** – the vaccine is being taken into care homes and into people's own homes if they cannot attend a vaccination site; and
- **Hospital hubs** – larger hospitals across the country have been offering the vaccine to people over 80 attending for a planned appointment. Now that more local vaccination services are up and running, hospital hubs are focused on vaccinating health and care staff.

GP led vaccination services

Key headlines:

- All registered patients in Brighton and Hove have access to an active local vaccination service supported by their GP practice;

- Three pharmacies are now live across Sussex providing a vaccination service accessible via the national booking system – Midhurst, Ore and Ticehurst.

The local vaccination services for Brighton and Hove are currently:

Brighton Racecourse, for patients at:

- Albion Street Surgery
- Allied Medical Practice – School House Surgery and Church Surgery
- Arch healthcare
- Ardingly Court Surgery
- Beaconsfield Medical Practice
- Broadway Surgery
- Park Crescent Health Centre
- Pavilion Surgery
- Preston Park Surgery
- Regency Surgery
- Saltdean and Rottingdean Medical Practice
- Ship Street Surgery
- Stanford Medical Centre
- St Luke's Surgery
- St Peter's Medical Centre
- The Avenue Surgery
- The Haven Practice
- Warmdene Surgery
- Wellsbourne Healthcare CIC
- Woodingdean Medical Centre

County Oak Medical Centre, for patients at:

- Brighton Station Health Centre
- Carden Surgery
- Montpelier Surgery
- Seven Dials Medical Centre
- University of Sussex Health Centre

Portslade Health Centre, for patients at:

- Brighton Health and Wellbeing Centre
- Benfield Valley Healthcare Hub
- Charter Medical Group
- Hove Medical Centre
- Links Road Surgery
- Mile Oak Medical Centre
- Portslade Health Centre
- Trinity Medical Centre
- Wish Park Surgery

Large vaccination centres

The first large vaccination centre for Sussex went live on Monday 25 January at The Brighton Centre.

The service is by appointment only with vaccinations delivered by teams from Sussex Community NHS Foundation Trust (SCFT), the largest provider of community services in Sussex.

The Brighton Centre will offer appointments 12 hours a day, 7 days a week, and as a result could deliver up to 3,000 vaccinations a day (subject to the supply of vaccines), enabling the NHS to significantly increase capacity to deliver vaccinations.

Further to The Brighton Centre, large vaccination centres in Eastbourne and Crawley have gone live this week.

Appointments for The Brighton Centre, and these large vaccination centres, is through the national booking system. People in the eligible groups, who have not had their vaccination and who live within 60 miles of a service location are receiving letters inviting them to book their vaccination.

The letters have caused confusion as they do not explicitly reference the local vaccination services that are also delivering the COVID-19 vaccination.

People who have received a letter can either use the national booking system to arrange an appointment at a large-scale vaccination centre or pharmacy, or wait to be contacted by their local vaccination service (supported by your GP practice) to arrange an appointment.

Roving service (care homes and those who are housebound)

People aged over 65 years old in care homes and those who look after them were identified as the top priority group for the COVID-19 vaccine by the Joint Committee on Vaccinations and Immunisations, due to their high risk from coronavirus.

Thanks to the dedication and commitment of our vaccination teams from GP-led services and Sussex Community NHS Foundation Trust, Sussex has met the government target to vaccinate older care home residents by the end of January 2021.

Residents living in all care homes for older people in Sussex have been offered the COVID-19 vaccine. A small remainder of homes in Sussex have had visits deferred for safety reasons, following a risk assessment, during local outbreaks. These homes – as well as any other residents or staff that were unwell or unable to have a vaccine at the vaccination team's initial visit, will be visited as soon as possible.

Frontline health and care staff across Sussex continue to be able to access the vaccine daily at one of our hospital hubs or vaccination centres.

Vaccinations for those who are housebound are also underway carried out by GP practices teams and Sussex Community NHS Foundation Trust. You will be contacted when an appointment is available and we are on track to have completed everyone who is housebound by mid February.

Hospital hubs

There are now seven hospital hub vaccination services in Sussex focused on the vaccination of health and care staff, including care home staff. Health and care staff will be told by their employer how they can book an appointment at one of the following hubs:

- Conquest Hospital, Hastings
- Eastbourne District General Hospital
- Mill View Hospital, Hove

- Princess Royal Hospital, Haywards Heath
- Royal Sussex County Hospital, Brighton
- St Richards Hospital, Chichester
- Worthing Hospital

Messages for the public

This is the largest vaccination programme ever undertaken by the NHS and a vital part of our fight against the coronavirus pandemic.

In Sussex we have developed a “When will I get my jab” campaign so that we can address any questions, concerns or would like to know more about the programme.

As part of the campaign, we will be promoting the campaign’s key messages across internal and external communications, including social media and the traditional media.

There is also now a range of digital animations to answer some of the big questions. These are all on the Sussex Commissions YouTube or we could send you the direct links – please feel free to share these on your own channels.

Over the coming weeks we will continue to promote three important messages for the public:

1. The NHS will contact you when it’s your turn. Services are very busy providing care and rolling out the vaccine, so please wait to be contacted.
2. Please act on your invite when it comes.
3. The vaccine is one of our best defences against COVID-19 but for now it is still essential that we do all we can to stop the spread of the virus. Adhering to the current restrictions and remembering hands, face and space will save lives and help the NHS.

More information is on the ICS website -

Frequently Asked Questions

We know that people want to know more about the vaccination programme and how it will affect them and their loved-ones.

To help us get information out to people and deal with the high volume of enquiries that we are receiving, we are regularly updating our FAQs on the [Sussex Health and Care Partnership website](#), to address common questions and queries.

A selection of those questions are below:

Who will contact me to offer me the vaccine?

You will be contacted by the first NHS service that is able to offer you a vaccination. This may be your GP, one of the large vaccination centres or another NHS service. The NHS will let you know when it's your turn to have the vaccine. Again, it's important not to contact the NHS for a vaccination before then. Note that you must still have received an invitation to book an appointment at one of the large vaccination centres.

Do people who have already had COVID-19 get vaccinated?

Yes, they should get vaccinated. There is no evidence of any safety concerns from vaccinating individuals with a past history of COVID-19 infection, or with detectable COVID-19 antibody, so people who have had COVID-19 (whether confirmed or suspected) can still receive the vaccine when it is their time to do so.

What is in the vaccine?

There is no material of foetal or animal origin in either vaccine. All ingredients are published in the healthcare information on the MHRA's website.

- [Pfizer/BioNTech information](#)
- [Oxford/AstraZeneca information](#)

The British Islamic Medical Association have produced [a helpful guide for the Muslim community](#).

If and when further vaccines are approved we will publish information about known allergens or ingredients that are important for certain faiths, cultures and beliefs.
