

COVID-19 Response Stakeholder briefing

18 February 2021

COVID-19 Vaccination update: Brighton and Hove

Welcome to your regular briefing from the Sussex Health and Care Partnership on the roll-out of the COVID-19 vaccination programme in Brighton and Hove.

Introduction

The COVID-19 vaccination programme continues to be rolled out across our communities. The top line brief from this week is:

- The Sussex system has achieved the national target to deliver >90% vaccinations for all those over the age of 70 by Feb 15th.
- We have offered the vaccination to everyone within the first four priority groups and remain committed to ensuring all those in these groups are vaccinated if they have not received it to date.
- To date more than 477,463 vaccinations have been delivered across Sussex, including 464,950 first doses;
- We are working with our local authorities, community networks and the community and voluntary sector to support communities where there are people who have not had the vaccine to ensure they are able to have access.
- We are now moving to provide the vaccination to those in the next priority groups. Cohort 5 (over-65s) have begun to receive letters in the post inviting them to book onto the national booking system to access the vaccination centres or pharmacy led services, or they can wait to be contacted by their GP led service. Cohort 6 (16-64 with underlying health conditions) will be invited to attend their GP-led local vaccination service.

Latest position

The latest official national data on vaccinations has been published today, this data reflects vaccinations up to 14 February 2021.

For full data: <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-vaccinations/>

As we achieved the milestone in terms of the first stage of the roll out of the programme, a summary of activity to date for Brighton and Hove is:

- **Priority 1 - Residents and staff in a care home for older adults** - all older peoples care homes have received first dose vaccinations with the exception of a small remainder of homes who have been deferred due to an outbreak. Vaccinations for these homes have been scheduled.
- **Priority 2 – People aged 80+ and frontline health and social care workers and aged 80+** - the majority of people aged 80 and over in Brighton and Hove have been completed. If anyone has not received their vaccination and would like it please contact your GP led vaccination service or the national booking system as soon as possible. Front line NHS staff have received first dose vaccination and we are working to ensure that remaining care staff vaccinations are completed.
- **Priority 3 - Aged 75-79.** 87.9% of those aged 75-79 have received the first dose vaccination in Brighton and Hove.
- **Priority 4 - Aged 70-74 and Clinically extremely vulnerable individuals** – 85% of those aged 70-74 have received the first dose vaccination. We have identified those who are clinically extremely vulnerable and to date 80.1% have been vaccinated.

Data this week shows:

11 /02/21	Sussex		Brighton and Hove	
Priority group	First dose	%	First dose	%
Age 80+	103,862	92.7%	10,060	86.5%
Age 75-79	72,033	93%	6,825	87.9%
Age 70-74	94,252	90.7%	9,568	85%
Age 65-69	50,379	51.9%	7,291	60.1%
Clinically extremely vulnerable individuals	57,053	87.7%	7,662	80.1%

How services are working

There are a number of ways in which the vaccination is being rolled out to our communities:

- **GP led vaccination services** – these include the GP led or community vaccination services, and pharmacy services in some areas;
- **Large vaccination centres** – each county will have at least one large vaccination centre which will be able to give the vaccine to large numbers of people as more supplies become available;
- **Roving service** – the vaccine is being taken into care homes and into people’s own homes if they cannot attend a vaccination site; and
- **Hospital hubs** – larger hospitals across the country have been offering the vaccine to people over 80 attending for a planned appointment. Now that more local vaccination services are up and running, hospital hubs are focused on vaccinating health and care staff.

GP led vaccination services

The local vaccination services for Brighton and Hove are currently:

Brighton Racecourse, for patients at:

- Albion Street Surgery
- Allied Medical Practice – School House Surgery and Church Surgery
- Arch healthcare
- Ardingly Court Surgery
- Beaconsfield Medical Practice
- Broadway Surgery
- Park Crescent Health Centre
- Pavilion Surgery
- Preston Park Surgery
- Regency Surgery
- Saltdean and Rottingdean Medical Practice
- Ship Street Surgery
- Stanford Medical Centre
- St Luke's Surgery
- St Peter's Medical Centre
- The Avenue Surgery
- The Haven Practice
- Warmdene Surgery
- Wellsbourne Healthcare CIC
- Woodingdean Medical Centre

County Oak Medical Centre, for patients at:

- Brighton Station Health Centre
- Carden Surgery
- Montpelier Surgery
- Seven Dials Medical Centre
- University of Sussex Health Centre

Portslade Health Centre, for patients at:

- Brighton Health and Wellbeing Centre
- Benfield Valley Healthcare Hub
- Charter Medical Group
- Hove Medical Centre
- Links Road Surgery
- Mile Oak Medical Centre
- Portslade Health Centre
- Trinity Medical Centre
- Wish Park Surgery

Large vaccination centres

Appointment only vaccinations centres are now available at:

- Westgate Leisure Centre, Chichester, West Sussex
- Crawley Hospital, West Sussex
- The Welcome Building, Eastbourne
- The Brighton Centre

The four centres provide further choice for eligible patients to the local GP-led vaccination services that now cover all patients in Sussex and select pharmacy led services that are also available through the national booking system.

Appointments for four vaccination centres are available through the national booking system. People in the eligible groups, who have not had their vaccination and who live within 60 miles of a service location are receiving letters inviting them to book their vaccination.

People who have received a letter can either use the national booking system to arrange an appointment at a large-scale vaccination centre or pharmacy, or wait to be contacted by their GP led vaccination service (supported by your GP practice) to arrange an appointment.

Roving service (care homes and those who are housebound)

Vaccinations for those who are housebound are underway carried out by GP practice or Primary Care Network teams and Sussex Community NHS Foundation Trust.

You will be contacted when an appointment is available.

People are being contacted directly by the team at their GP practice, Primary Care Network or GP led vaccination service to arrange an appointment. Importantly, people will be contacted before a visit is made so that the appointment is confirmed and the person at home is expecting the NHS vaccination team.

At the same time, we understand that people who may be housebound are also receiving a letter from the national booking service inviting them to go online or call the national phone line to book an appointment at one of the vaccination services or pharmacy led services.

Currently the national system cannot distinguish that someone is housebound and so these letters are being sent to all those who are eligible.

If you are housebound and are not able to attend a local vaccination service or centre, please ignore this letter. You are on the list with your GP led vaccination service team and they will contact you – you do not need to call your GP practice or any other team to make an appointment. As soon as an appointment is available you will be contacted directly.

Hospital hubs

There are now seven hospital hub vaccination services in Sussex focused on the vaccination of health and care staff, including care home staff. Health and care staff will be told by their employer how they can book an appointment at one of the following hubs:

- Conquest Hospital, Hastings
- Eastbourne District General Hospital
- Mill View Hospital, Hove
- Princess Royal Hospital, Haywards Heath
- Royal Sussex County Hospital, Brighton
- St Richards Hospital, Chichester
- Worthing Hospital

Working with our communities

We are working with our diverse communities across Sussex to ensure that people have information about the vaccine, how and when they might be contacted for a vaccination appointment and where they may need to go.

We know that community members are our best methods for sharing information; we now have over 100 Vaccination Champions from communities across Sussex, who play a vital role in ensuring that correct information is shared through their networks and contacts. We also link with many other individuals and groups who liaise with communities to ensure we can reach and hear from as many people as possible.

Over the past week, we have been:

- Sharing videos about vaccination in community languages, and supporting the production of information in British Sign Language
- Ensuring that we share information about community language and British Sign Language interpretation with our communities and with our vaccination centres and sites
- Working with Carers' support organisations across Sussex to develop [bespoke information](#) for unpaid carers
- Liaising with organisations that support people with Learning Disabilities to ensure they have appropriate information
- Liaison with local Faith leaders and groups to cascade information and to answer questions
- Working with organisations that support older people to ensure they are able to pass on information and answer questions
- Asking some of our community and patient groups to help us shape our communications work to make sure it is clear and appropriate

Our team are always happy to attend (virtually) any community meetings to hear people's experiences and answer questions- please contact us on sxccg.publicinvolvement@nhs.net

We are keen to hear from people about their experience of the vaccination programme, the information you are receiving or not receiving, and your actual experience of having the vaccine – positive experiences and where there need to be improvements.

Share your views through our [survey](#), or tell us your [story](#).

Our survey will help us shape how we continue to roll out this vaccination programme to our communities over the coming weeks and months; it is open until Friday 27th February.

Frequently Asked Questions

We know that people want to know more about the vaccination programme and how it will affect them and their loved-ones.

To help us get information out to people and deal with the high volume of enquiries that we are receiving, we are regularly updating our FAQs on the [Sussex Health and Care Partnership website](#), to address common questions and queries.

A selection of those questions are below:

I am aged 65-69 and have been sent a letter inviting me to book my vaccination – what do I need to do

People aged 65 to 69 are the next eligible group for the vaccination.

People in this group are starting to receive letters from the national vaccination booking system inviting you to book your vaccination appointment. You can do this online by visiting www.nhs.uk/covid-vaccination or calling 119 free of charge.

Through the national system you can arrange your appointment at one of the larger vaccination centres including Chichester and Crawley or one of the pharmacy services like in Midhurst.

You also have the choice to ignore the letter and you will be contacted by your local GP led vaccination service when an appointment is available for you.

Can I get the vaccine if I'm not living at my usual address?

Any resident registered temporarily with a Sussex GP practice is entitled to receive their vaccine through that practice. They will be included in the correct priority group and invited for vaccination as appropriate. If you are not registered with a practice you should call your nearest practice to register as a temporary resident.

If a person has registered but their temporary registration has ended, or the practice has closed its list, they can call this number for help: NHS England Customer Contact Centre on 0300 311 22 33.

Will I miss my vaccination if I am in hospital?

If you are in hospital when you become eligible for your vaccination, you will be able to have it when you are discharged. It does not matter if the next priority group is already being vaccinated; everybody eligible will be able to have the vaccine. However, if you were in hospital with COVID-19 you must wait until at least four weeks after the onset of symptoms or the date of your first positive COVID-19 test.

When you are out of hospital you can call your GP to inform them that you are now ready to have the vaccination, and they will arrange for you to have an appointment at your local GP-led service. Alternatively, you can book online or by telephone to have your vaccination at a large vaccination centre. Visit <https://www.nhs.uk/conditions/coronavirus-covid-19/coronavirus-vaccination/> or dial 119 to book.
